Ongoing

TECHNICAL SKILLS

Programs that I am familiar with apart from the basics.

- React
- PHP

SUMMARY

Motivated and adaptable Software Engineering student at AASTU with a strong foundation in frontend development using HTML, CSS, JavaScript, and React. Experienced in building responsive and user-friendly interfaces, with additional exposure to backend integration and database management (MySQL). Passionate about creating real-world solutions, collaborating on team projects, and continuously improving through self-learning and the strategic use of AI tools. Actively seeking internship or junior-level opportunities to contribute to impactful development teams while growing into a full-stack role

WORK EXPERIENCE

Frontend developer(Intern) 2025 -PRESENT(3 months)
KurazTech |Mexico,Yobek Building

This was an internship offered by Kuraz tech and I have been working as a frontend developer in real world projects. It enhances my experience in working as a team.

PROJECTS

📚 ResourceHub – Platform for Software Engineering Students

- A student-focused web platform that organizes essential software engineering resources in one place. It offers curated roadmaps, tutorials, interview prep, and project ideas to help students grow throughout their learning journey.Done using react, Tailwind and PHP
- Served as a team leader with 5 members and also done the frontend as well as the authentication part of the project.
- **Github:** https://github.com/Eleni-Bisrat/GROUP4_IPII_PROJECT

🕒 TimeBank – Skill-for-Time Exchange Platform AASTU Hackathon 2025

- A web platform where students can exchange services and skills using time credits instead of money.
- "You help me fix my laptop for 1 hour, I teach you Python for 1 hour."
- Worked as a frontend developer using react and held the 2nd place in the hackathon. We were also priced for one of the best teams from all competitors.
- Includes React,Typescript,TailwindCss,Python
- **Github:** <https://github.com/wende12github/Silent-Coders>

- JAVA
- DSA
- SQL
- Nodejs
- Figma

Supermarket Management System – Desktop App for Store Operations

- A desktop-based application designed to streamline daily operations for supermarket staff and store managers. Built with Java, Swing (for GUI), and MySQL for persistent data storage, the system offers a clean, intuitive interface and efficient functionality.
- "Manage products, customers, employees, and sales all from one dashboard."
- I have worked in this project starting from bringing the idea to the table and also as a project leader and also developed the GUI and most of the backend parts using java.
- **Github:** <https://github.com/Emnet19/SuperMarketMgt-Java>

Image Gallery – Interactive Web-Based Image Explorer

- A responsive and category-based image browsing platform that allows users to search, filter, and preview images with a smooth and intuitive interface. Built with modern frontend tools, it showcases clean design and dynamic interaction.
- This was a project that I took from the code alpha internship and I have done it using react.
- **Github:** <https://github.com/Emnet19/ImageGallery>

Personal Portfolio

- A responsive and more descriptive portfolio which is done using react and also holds the above projects with their pictorial descriptions.
- Has a resume section which will redirect to these resume.
- **Github:** <https://github.com/Emnet19/PORTFOLIO1>

CERTIFICATION & ACHIEVEMENTS

- Completion certificate on learning react from GDG(Google Developers Group) at AASTU.
- Achieved 2nd place at GDG hackathon with the topic of "Time Bank" at AASTU techfest of 2025.
